BIOGRAPHY.

Use limited space to create infinite space and give life to materials. Space has its own life, and design gives soul. As an interior designer, I believe that creation is about releasing art from the mind. The beauty of the soul comes from human emotions such as selflessness, altruism and love, and when these beautiful emotions naturally per- meate into the works and work process, the energy generated is enough to create a win-win and happy harmony.

EXPERIENCE.

University
