

EDUCATION

Wenzhou Kean University

Sep 2020 – Jun 2025

➤ Bachelor of Fine Arts in Interior Design

➤ GPA: 3.0/4.0

PROJECTS

Kid Libaray

Mar 2024-Jun 2024

- The project aims to create an interesting and diverse exchange space for the small village, adding more vitality and activities to Wenzhou's future development.
- This project uses a steel net structure as the base structure. The building is divided into indoor activity spaces and outdoor spaces, and there are also some special areas, especially designated for children.

Crested Ibis Conservation Center

Sep 2023 – Dec 2023

- The design project explores the complex communication between humans and non-humans in wildlife protected areas. By designing a crested ibis conservation center, it explores the new vision for the Hancheng National Nature Reserve in Shaanxi Province.
- The goal is to explore a new model of coexistence between the crested ibis and humans, aiming to integrate the architecture with the natural environment and minimize the interference of the crested ibis's activities through the treatment of building spaces.

Future Community Design Project

Jun 2023-Aug 2023

- This project presents a future community design comprised of low levels that retain traditional social interactions and high levels with flipped virtual and reality social interactions, as well as modeled block applications. Starting with a contemporary transition of social model, every five building levels are divided into one residential unit based on different social models, thereby creating personalized spaces for different groups and showcasing an entirely new future neighborhood scene.

Above the River - Art Public Exchange Center (Rural Culture) Project

Mar 2023 – Jun 2023

- The project is designed to maintain the traditional covered bridge's function of transportation and resting while introducing a new space for artistic exchange, and modernizing the form language of the rain bridge.
- Envisioned a pedestrian bridge and artistic public gathering space spanning the river in Lushu Water City, Chengdu, aiming to enhance connectivity between community clusters, parks, and commercial spaces.

INTERNSHIP

Tongzhou Design Group

Hangzhou, CHN

Architectural Design Intern

Jun 2024-Aug 2024

- Assisted in the completion of project design, engaged in the design of residential projects, achieved project cost savings and completed the design cycle ahead of schedule
- Participated in market research, analyzed competing products, provided effective design references for the team, and improved the quality of design proposals
- Reviewed and revised architectural drawings together with the team

STUDENTS ACTIVITIES

Designer, Primary School Library Design Project

Jun 2022- Dec 2022

- Communicated with the school's administration and faculty team to understand the functional requirements and aesthetic preferences for the library

Ye HE
tooru4th@163.com | +86 15925828572
Zhuji, Shaoxing, Zhejiang, CHN 311813

- Conducted on-site measurements to gather spatial dimensions and structural data
- Designed the floor plan for the library, including the layout of the reading area, book storage area, activity area, and work area

SKILLS

Real Estate: CRE Modeling

3D Modeling: Rhino Software, Sketchup

Office: Word, Excel, PowerPoint

Data Analysis: SQL, Arc GIS

Illustration: Adobe Suites
